

Connect switch to recorder via WAN port.

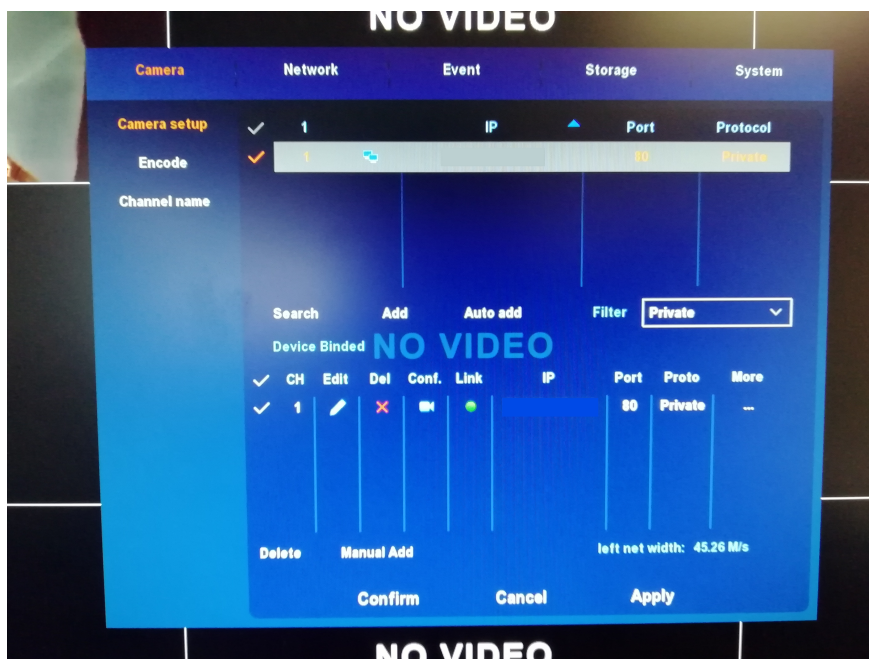

Plug cameras and router in to switch.

Turn recorder and switch on.

Right click, click **menu** then go to **network**. Tick the **enable DHCP** option, then **apply** and **confirm** the changes.

Right click, click **menu** then go to **camera**. Change the **filter** option to **private** and click **search**. This should find all the cameras you have plugged in - click the tick boxes next to found camera and then **add**.

Download correct version of [search tool](#) – either Windows or Mac.
