

# CCTV Cabling Guides - Non PoE IP Camera Cabling

03 November 2020 08:53

There are several ways to cable an IP system as some cameras are PoE, some aren't, some NVRs have built in PoE ports

## Non PoE Cabling

1

### Network Cable

Use ethernet cable to connect your NVR directly to you Router

2

### Power

As the cameras are not PoE enabled you would need to power each camera separately at its location using a plug in power supply.

### Example PSU:

Single Psu
