i-dvr.net DDNS SETUP

Congratulations on your purchase of an ECO series DVR from Digital IDView.

This unit supports multiple DDNS servers including two servers maintained by us.

On the bottom of your DVR is a user name and password for the i-dvr.net server. I

After putting in the user name and password click on Logon and you will see this screen:

	Delete a host name or upo	late the IP address by using the H	ost Manager section.
	host.domain	IP	actions
	idview.i-dvr.net	66.180.119.121	update delete
Add New Record			[]
Add New Record	host.domain	IP	actions

In the DDNS setup (go to menu/main menu/network setup) input information and put a check in the enable DDNS box. Click OK and you are done.

DDNS SETUP			
✓ Enable DDNS			
DDNS Server:	i-dvr.net		
Host Name:	idview.i-dvr.net		
User Name:	insert name from disk		
Password:	•••••		
[MENU] OK; [ESC] Ca	ncel OK Cancel		

In browser bar you will type http://idview.i-dvr.net and you will see your cameras.
