How to Register a account for EaglesEyes Cloud Services

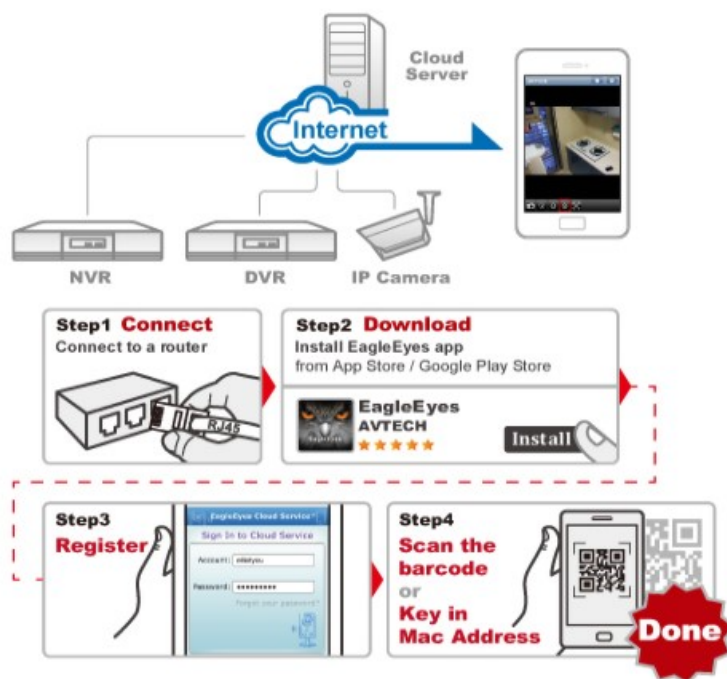

Plug & Play

Easily complete the network configuration with Cloud EaZy Networking

Cloud EaZy Networking is developed for AVTECH products (DVR / DVR / IP cameras) to simplify network configurations by following steps below:
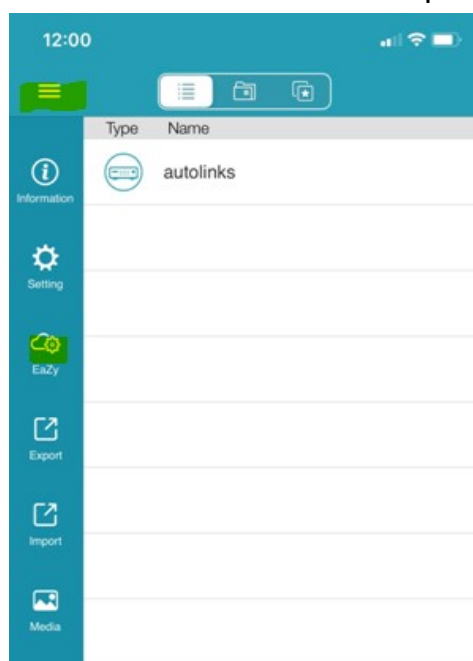

1. Connect RJ45 cable to a router hooking up with Internet

2. Download the AVTECH mobile app, EagleEyes, and install

3. Register an account for EagleEyes Cloud Services on EagleEyes

4. Scan the barcode (on the monitoring display or on the device itself depending on the device you have)

Note: You could manually key in the MAC address of the device in case barcode scan fails.

How to register an account for EagleEyes Cloud Services on Mobile device.

1. Open the EagleEyes App
2. Click on the 3 lines in the top left of the app and select Eazy

3.
4. Now click Login

5. Now select Register and enter the required information

6.
