## How to install Hikvision iVMS 4500 app on Android Device

Below is guide on how to install the Hikvision iVMS 4500 app with motion detect notifications allowed on the Android device.

- 1. On the Android device, open a web browser and go to the following location on the device <a href="http://appstore.hikvision.com">http://appstore.hikvision.com</a>
- 2. Download and install the latest version of the iVMS-4500 app
- 3. Click the install option

4.

6.

5. At the prompt Blocked by Play Protect, click INSTALL ANYWAY

7. Allow iVMS-4500 access to resources on your android device

8.

9. Now add your required CCTV system in iVMS-4500 and save settings, then click on the back arrow icon in the top left hand corner

©	New Device	8
Alias	New Device 01	0
Register Mode	IP/Domain	>
Address		
Port	8000	0
User Name		
Password		
Carnera No.	1	

11. Now click on the hamburger (three lines) menu in the top left

13. Now select the Alarm option

15. To enable notifications for the CCTV system that you created earlier, select **Set Alarm Notifications** (enable) notifications

	$\odot$	Set Alarm Notification
