

Export camera footage on Pro-view system

16 February 2021 12:28

Below is how to export video footage from Pro-view cctv system

1. From the main screen of the cctv system right click to bring up the below options and select Backup

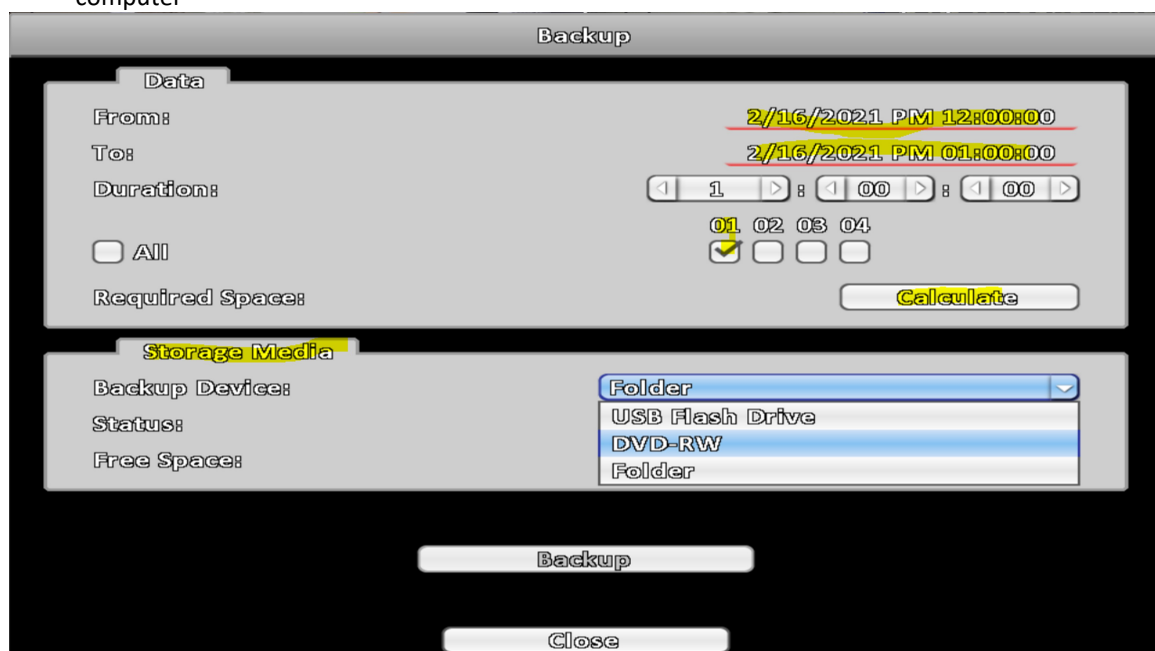

3. Select From and To option select the required time frame of video footage to export

User can backup recorded video data of a specified time frame. The DVR can backup video data to either direct-attached storage, such as DVR or USB drive, or remote folder of a PC.

2-2.1 Selection

Item	Description
From	The start time of video data to be backed up
To	The end time of video data to be backed up
Duration	The time duration of backup file
All	It can select all channels or clear all selected channels to backup
Required Space	Show the size of the backup file

5. You can then select the camera-camera's (CH01-CH02- etc) that you want the footage from
 - Calculate - calculate how big the exported footage size will be.
 - Storage Media - choose the backup devices
 - USB Flash Drive - usb drive plugged into a usb port on the cctv system
 - Folder - browse and save to local pc if you have connected to the cctv system using iWatch DVR desktop app on your computer

7. Select Backup when you have selected the desired options above to export video footage from the cctv system
8. If your struggling to play back video footage once exported, VLC player is free video player that can be downloaded free onto a

computer to view video files
